PUCK LIGHT JIG NOW AVAILABLE!

Revolutionary design eliminates false bottom/cabinet build-ups!

Most cabinetmakers know that the installation of under mount cabinet lighting in upper cabinets or shelves typically requires a "false bottom" or "build up" to hide the wire for the light. **Not Anymore!** TP Tools light jig easily and accurately eliminates false bottoms. Conceal wires directly in the cabinet bottom or shelf. Now you can install a puck light, strip light, switch or whatever you can think of in 3/4" or 5/8" material using this patented 3/8" wire concealing kit!

Includes: 12" x 3/8" drill bit, 2-1/8 and 2-1/4 Forstner bits with depth stops. Requires 1/2" hand drill for installation.

Item #: JKTP-PLJ

Can also be used to hide wiring for strip lights and switches.

MADE IN USA

LIFETIME WARRANTY
Bushings are backed with a lifetime warranty.

TRUE POSITION TP TOOLS

Note: Other size set-ups (35mm, 55mm and 68mm) and 18" drill bits also available (sold separately). Please contact your Würth Baer Supply Representative for additional information.
