## Why SurfPrep?

The SurfPrep Sanding System has "brought the fun" back into sanding. When one thinks about sanding, they usually don't think "fun"...sanding isn't fun; however, SurfPrep has reduced and eliminated what has always been a sanding department's most mundane, boring, time-consuming task. Although sanding and preparing a surface is a critical step, doing so with SurfPrep makes for a better overall quality finish. SurfPrep has fine-tuned its variety of sanding systems by adding new products to the kits. During thousands of technical visits to woodworking manufacturers in North America, their team discovered areas in production that would benefit with a larger variety of foam abrasives and accessories. These products are minimizing physical effort and discomfort which maximizes efficiency in production lines from beginning to end; white wood to stain.

### Why would I consider using SurfPrep foam abrasive pads compared to regular sandpaper, and what are the benefits?

Choosing to use the SurfPrep sanding system will drive costs of preparing any surface down greatly due to the fact that SurfPrep outlasts traditional sandpaper by a huge margin. SurfPrep resists loading because it remains cool while sanding. Regular sandpaper sheets begin to load up (or pill) at the point of contact with the substrate being sanded which is the cause for loss of cut and reduced life. SurfPrep's unique adhesive in conjunction with their 21st century abrasive grain outlasts sandpaper. SurfPrep rides the surface of your substrate, whether flat or profiled, without cutting or burning through the finish. Traditional abrasive sheets tear easily and lose the abrasive grain quickly as the sheet is folded or creased causing an uneven, irregular sanded surface. SurfPrep's proprietary solvent free adhesive system will not tear easily and never loses its grain or bond to the foam.

### What exactly is "The SurfPrep Sanding System"?

SurfPrep foam abrasive pads are used in conjunction with SurfPrep back up pads and SurfPrep/Air Vantage Air Tools. This is "The SurfPrep Sanding System". SurfPrep is used for preparing any and all surfaces and coatings of any kind. SurfPrep is a unique sanding pad manufactured with engineered abrasive grain coated on one side of the foam with the opposite side being flocked with SurfPrep's signature red colored flocking. The red flocking allows the SurfPrep foam abrasive sanding pad to be attached to the uniquely made SurfPrep low profile hook backup pad. SurfPrep abrasive pads are manufactured to the highest quality standards and tightest tolerances.

### What surfaces can I prepare or sand with SurfPrep?

Name it and SurfPrep can prepare or sand it! SurfPrep is successfully used on metal, polycarbonates, fiberglass, plastics, sealers, primers, carbon fiber, aluminum, steel, white wood, melamine, metallic coatings, top coats, UV cured coatings, the list goes on...

### Why is it better to use the SurfPrep sanding system versus the outdated manual hand sanding method?

Save time, have better control, even contact with surface sanded, ergonomic, efficient, and nice consistent scratch! In the case of woodworking, many large production shops have automated finishing lines where parts move on a line at a quick pace. Often times there will be 2-4 individuals sanding sealer in preparation for top coat. Sanding with the SurfPrep system is quick, efficient, consistent and allows for parts to move smoothly down the line. Operators are less fatigued and get better sanding coverage with the SurfPrep system.

### How large or small of a company uses SurfPrep?

Because of the benefits and cost savings, SurfPrep foam abrasive sanding pads can be found being used in the largest manufacturer of hockey blades to smallest two person shop making kitchen cabinets.

AWFS *Visionary Awards Winner*

**2015 VISIONARY AWARD WINNER**  
**PRODUCT INNOVATION & PRODUCTIVITY IN SANDING**

**3" x 4" SANDERS**

**10,000 RPM Orbital/3mm Orbit**

- Low profile, compact footprint designed for use on flat surfaces, recessed corners, inside drawer boxes, profiled moldings, etc.
- Consistent sanded finish, no 'crossover scratch' or 'fish hook' marks when used with SurfPrep Foam/Film abrasives
- Reaches effortlessly into tight corners, sanding all areas completely with 12' highly flexible red ball swivel air hose, saving hundreds of dollars annually on costly air leaks by eliminating metal coupler/heavy rubber hose connections
- Durable, lightweight nylon composite bodied sander withstands rugged industrial applications and are excellent for both prep & finish sanding
- Large variety of SurfPrep Foam/Film Abrasives for prep to finish sanding
- Can easily be converted into a more "aggressive leveling sander" with the simple addition of a pad saver with SurfPrep Film cut sheets
- Pad Saver enhances life & protects backup pad. Soft Interface Pad for level sanding of machine marks on profiles.
- Highest quality precision bearings & hardened steel motor assembly
- SurfPrep Tool Oil for years of flawless operation

Note: Models shown are Non-Vacuum. Self-Generated Vacuum and Central Vacuum set-ups also available.

**Includes: SPSPSS3X4:** Sander, 12' Air Hose, Variety Pack of both Foam and Film abrasives as well as specialized accessories. **SPSPS3X4:** Sander only.

## Foam Abrasives The Ultimate Alternative To Conventional Sandpaper

- SurfPrep foam abrasives are manufactured with premium abrasive grains and flexible adhesives that are coated directly onto the surface of the foam
- Our unique method of coating, in addition to the use of "solvent free" adhesives, is a contributing reason for the elimination of heat buildup at the point of contact and extends the life of SurfPrep foam abrasives as much as 10X and more over conventional sandpaper
- SurfPrep has done what no other product has done before...tool sanding in the place of hand sanding
- The flexibility of the foam in conjunction with the perfect orbit of the sander allows for a flawless finish
- SPVPFOAM3X4 variety pack includes 5mm, 10mm & 1/2" abrasives in Coarse +, Medium, Fine, Very Fine & Super Fine + (2 of Each Grit)

Packing & Sold in: As shown below. Sold in full box quantities only.

## 5" & 6" TRIDENT SANDERS

### 12,000 RPM Orbital - 3/16" or 3/32" Orbit

- Designed with a durable composite body the Trident sanders are lightweight with a compact, recessed throttle lever.
- Ergonomically balanced for added comfort and control for the operator
- Cutting edge 'cooling fan' creates air flow around the counterbalance spindle bearing which enhances the life of the tool
- Motor assembly is constructed of hardened steel for the cylinder and both end plates
- 360° swivel exhaust grate allows operator to redirect air flow
- No external cap/filter to lose or damage
- Pad Saver enhances life & protects backup pad. Soft Interface Pad (5" only) for level sanding of machine marks on profiles.
- Highest quality precision bearings & hardened steel motor assembly
- SurfPrep Tool Oil for years of flawless operation

Note: Models shown are Non-Vacuum. Self-Generated Vacuum & Central Vacuum set-ups also available.
